ALARM MONITORING

The cost to the Customer for alarm monitoring is from \$25.00 per month.

The monitoring station receives the following information:

- ◆ The time the alarm is turned on
- ◆ The time and person who turns the alarm off
- ◆ A test signal sent once a day to test the phone connection
- ◆ The time that your power is turned off (Power Cut)
- ◆ The time your power comes back on
- ◆ The time your alarm battery starts to fail
- ◆ The time and location of any alarm activation (Lounge zone)
- ◆ The time of any panic activation

The staff on duty reacts as instructed by you as to their actions:

- ◆ Notify you at work or on a mobile phone
- ◆ Notify friends or neighbors
- ◆ Notify a Security Guard Company

If a Security Guard Company was employed, you would expect to pay between \$50 and \$150 per year for keyholding and administration costs, and a callout fee of approximately \$30 per callout (This is a time related charge).

Any questions please give me a call
